OF THE IBC SOLAR LINE.**

Excellent. Efficient. Expert.

EXCELLENT: **IBC SOLAR – Smart Systems for Solar Power for over 30 years.**

We have been working successfully towards making solar power as affordable as possible and towards increasing efficiency for over 30 years.

IBC SOLAR AG is one of the leading international energy companies which provide intelligent photovoltaic systems as high-performance system solutions of all sizes and for any purpose. The company's economic strength and financial independence is confirmed by globally acknowledged rating agencies.

Smart Systems for Solar Power thanks to perfectly coordinated components, over 1,000 highly qualified partners worldwide, more than 3,000 megawatts of installed capacity and over 160,000 photovoltaic systems testify to IBC SOLAR's high level of expertise.

With 3,000 megawatts of power ...

an electric car can travel
535,714 times
around the world

or

2,000,000 people
are supplied with solar power
annually.

EFFICIENT:

The Value-Added Modules of the IBC SOLAR Line will pay off for you.

Easily more experience:
Expertise that pays off for you.

Significant product experience

The Value-Added Modules of the IBC SOLAR Line have the best possible mixture of materials and module design. They are the result of 30 years experience and development. This guarantees you maximum yields and a high level of security and reliability.

Extensive experience of the market

Whether it be large, small or photovoltaic systems in extreme climatic conditions – with over 3,000 megawatts of installed capacity worldwide and more than 160,000 realised photovoltaic systems IBC SOLAR's high level of expertise speaks for itself. IBC SOLAR's Value-Added Modules ensure that you are always up to speed.

Easily more security:
Guaranteed greater value for money.

Complete warranty security with IBC SOLAR

The certified credit rating proves that the warranties for IBC SOLAR Value-Added Modules are secured now and in the future. You make a sound decision.

Secure financing

The Value-Added Modules of the IBC SOLAR Line are rated as absolutely financeable by leading financial institutions. This makes financing easier.

Easily more quality:
The highest standards for your total satisfaction.

Permanently reliable

The IBC SOLAR Value-Added Modules are solely manufactured on state-of-the-art production lines. You benefit from robust and secure modules which produce energy reliably.

Thoroughly monitored and tested

Practical product tests and comprehensive inspections of incoming goods and production ensure that the IBC SOLAR Value-Added Modules are of the highest quality. This gives you maximum reliability for the module's entire service life.

Easily more efficiency:
Strength right down to the last detail.

Maximum economic viability

The IBC SOLAR Value-Added Modules are exclusively equipped with high-performance cells, positive performance tolerance and a 25-year performance warranty. This results in the highest possible yields which pay off in the long term.

Easily more system:
Everything fits together perfectly.

Systematic planning

With IBC SOLAR everything is well thought-out right down to the smallest detail – from the highly-qualified IBC SOLAR Partners through to customised system design with the leading planning software, the PV Manager.

Smart Systems for Solar Power

IBC SOLAR Value-Added Modules combined with other IBC SOLAR components form a perfect system and ensure top-level performance. Convince yourself of the benefits IBC SOLAR's smart systems have to offer!

Easily more service:
All-around carefree package with IBC SOLAR.

Expert advice from regional professionals

Our regional IBC SOLAR Partners guarantee you individual customer support. Everything from personal advice and a tailored product range through to professional and rapid installation. Your trained IBC SOLAR Partner will be right by your side to provide you with expert support right from the outset.

Good to know

Further information on our IBC SOLAR Value-Added Modules can be found at www.ibc-solar.com/valueaddedmodules

Versatile, flexible and perfect for you.

Polycrystalline and monocrystalline solar modules are part of the versatile portfolio of the IBC SOLAR Line. For an even higher yield, these are also available with innovative Smart Technology. Consult your regional IBC SOLAR Partner! He will be happy to offer you advice and will find the perfect solution to meet your requirements!

EXPERT:

Our worldwide references speak for themselves

Staying true to our principle “Good is not good enough”, we develop and create solutions to meet every need and for every size. No matter whether photovoltaic systems for homes, businesses, PV power plants or systems for independent power supply – you will always have the support of IBC SOLAR as a strong and expert partner.

“I would never have thought that I would actually look forward to receiving my electricity bill. But with the solar power system for my home, I can save real money every month. My regional IBC SOLAR Partner advised me competently, proposed the ideal solution and installed everything perfectly.”
Jürgen Eberhard

“In my company I set high demands to my products. Therefore, I also expect the best quality from my energy supply. Thanks to IBC SOLAR I could now significantly reduce the electricity costs with self-consumption and thus become more independent of rising electricity prices.”
Tony Borgmans, Director, Geo-park Geel

“When investing in our solar power plant, there were a lot of decision-making factors. Powerful components played a crucial role here. Besides high-quality modules, IBC SOLAR gives the safety of a solid German guarantor, hence we were able to secure attractive financing conditions.”
Kurt Schwan, Project Development, WVE GmbH

“Even here, in a remote corner of the earth, the low maintenance modules from IBC SOLAR secure a reliable power supply. With solar power we could, for example, reduce 99% of our diesel consumption. This protects both, our environment and our pocket.”
Frauke Fleischer-Dogley, CEO, Seychelles Island Foundation (SIF)
