IBC SOLAR MOUNTING SYSTEMS

Systematic. **S**wift. **S**ecure.

SYSTEMATIC: Only IBC SOLAR mounting systems can offer you this.

IBC AeroFix system: The quickest flat-roof solution.

By far the quickest mounting system on the market

Low system weight

Extremely stable even with large wind loads, as it is aerodynamically optimized in the wind tunnel

Short mounting time thanks to high level of preassembled products

Flexible system design for optimum roof coverage

No roof penetration

South system

AeroFix 10-S

AeroFix 15-S

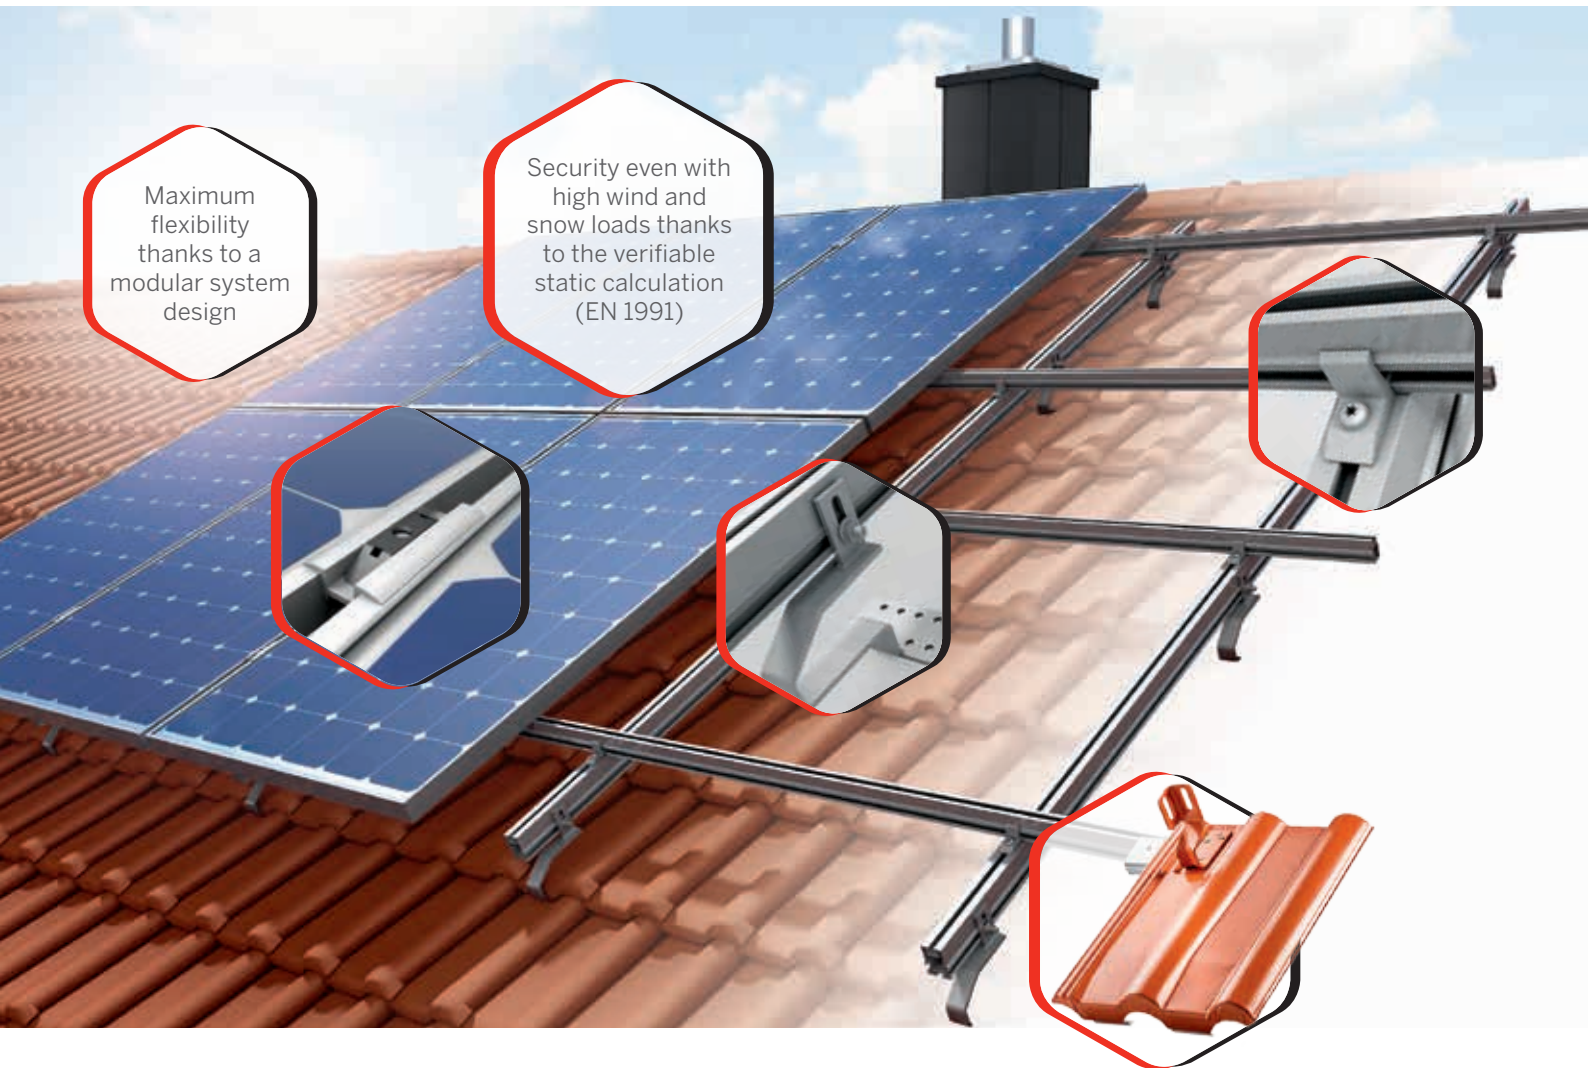

East-West system

AeroFix 10-EW

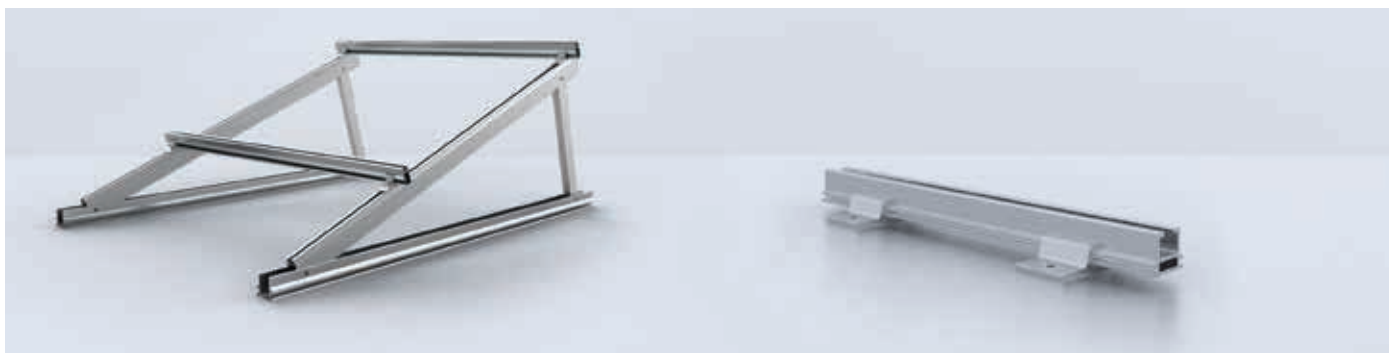

IBC TopFix 200 system: The all-rounder for pitched roofs.

Delta-Support with many inclination angles for optimum module alignment

Trapezoidal System "Eco" system combines a cost-effective design with quick mounting

SWIFT.

The most economical way of working.

10 reasons why you can complete your project quicker and more efficiently with IBC SOLAR mounting systems.

01 Optimized solutions for almost all areas of application and customer requirements.

A great deal of freedom thanks to Smart Systems for Solar Power.

04 Low installation costs thanks to pre-assembled components.

Complete in a few simple steps.

07 Timely delivery of the complete PV system to the construction site.

Just-in-time installation.

08 Expert and permanent sales and aftersales contact.

Active support for your project.

10 Outstanding value for money with 10-year IBC SOLAR warranty.

Customer satisfaction guaranteed.

02

Simple design, proposal preparation and ordering with planning software "PV Manager".

Implementation at the touch of a button.

03

Project-specific static.

Everything calculated professionally.

05

Assessed and certified components with building authority approvals.

It's best to be certain.

06

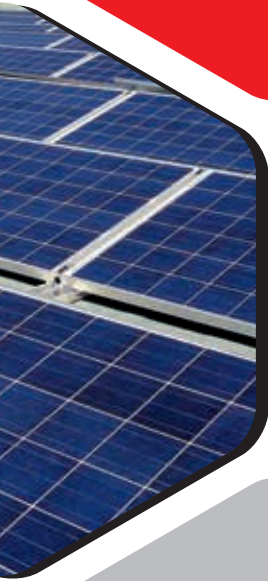

Excellent product quality through the use of high-quality materials made from aluminium and stainless steel.

Reliability pays off.

09

Professional marketing support and product training courses.

You can focus on the important things.

SECURE:
See the quality of
IBC SOLAR for yourself.

“ IBC AeroFix has more than proven that it can withstand a storm. The rows of modules on the roof didn't even move a millimetre, even through the system isn't screwed to the roof and only requires minimal ballast. That shows me that I can absolutely recommend IBC AeroFix to my customers. It does exactly what it promises and can withstand even strong loads in wind load zone 4 without any problems. That allows it to guarantee my customers the safety of their investment in a photovoltaic plant. ”

Joachim Här
WISONA

“ The most important thing to me was to be able to make my customer an attractive, unified offer. Together with the PV manager and components and installation system from IBC SOLAR I can take every detail into consideration and really get the best out of the system when planning and installing the plant – both from an economic and a technical perspective! ”

Frank Helms
Solarstrom Celle

“ IKEA's founding concept is easy assembly and sophisticated systems. The same applies for IBC AeroFix. We are delighted to have been able to realise our largest solar plant so far on the roof of the IKEA branch in Rothenburg. The cooperation with IBC SOLAR worked brilliantly, from the configuration of the system right up to the installation. ”

Marius Fischer
BE Netz

The decisive factors when constructing a photovoltaic system are quality and safety. IBC SOLAR mounting systems are tested according to strict criteria in order to ensure consistently high quality and safety. The IBC TopFix 200 therefore meets all building authority approval requirements.

See for yourself. You have the choice:

- 1 We come to you!**
On-site service for your initial installation
- 2 You test it yourself!**
Product training at the IBC SOLAR Competence Center
- 3 Do you require more information?**
